

Evolution of interacting populations

Tuesday 17 September 2019

Session 6: Session 6 - Lecture Hall (09:00 - 10:40)

time	[id] title	presenter
09:00	[22] Privatisation of public goods can cause population collapse	LINDSAY, Richard
09:20	[23] Artificial selection in small bacterial communities	VESSMAN, Björn
09:40	[24] Do single season frequency changes predict multi-season outcome for a mixed species Candida community?	JEPSON, Alys
10:00	[25] How invader and community traits shape the long-term consequences of biotic invasions	BARBIER, Matthieu
10:20	[27] Multiple evolutionary (games) interactions	REVATHI VENKATESWARAN, Vandana
