

Modeling Diversity in Cancer And Virus Evolution

Tuesday 15 May 2018

Session 4 - Lecture Hall (15:50-17:25)

time	[id] title	presenter
15:50	[10] Convergence in viral populations	BERTELS, Frederic
16:30	[11] Exploring evolutionary trajectories of populations subjected to sequences of drugs in vitro	KRISHNAN, Nikhil
16:55	[12] In-depth characterization of a hallmark for balancing selection: HLA heterozygote advantage against HIV-1	ARORA, Jatin
