

# Talking Evolution

## Wednesday, September 26, 2018

### Niche construction (2:00 PM - 5:15 PM)

time	[id] title	presenter
2:00 PM	[2] Keynote: The Extended Synthesis: A Human Evolution Perspective	LALAND, Kevin
3:00 PM	Coffee Break	
3:30 PM	[3] Conditions for evolution by natural selection and niche construction	PASZTOR, Liz
3:45 PM	[4] Perspectives on programmed cell death in microbial communities: group selection, niche construction and phenotypic plasticity	DURAND, Pierre
4:00 PM	[5] Let the concept of eco-evolutionary feedbacks be mechanistic!	MATTHEWS, Blake
4:15 PM	[6] Discussion Niche Construction/ Ecological Adaptation	MALTSEVA (POSTER), Arina GAHR (POSTER), Christoph VANADZINA (POSTER), Karina LALAND (DISCUSSION PANEL), Kevin
	- [1] Comparative approaches to niche construction in ray-finned fishes (Actinopterygii)	VANADZINA, Karina
	- [2] Living together, adapting differentially: case of the Littorina genus cryptic species	MALTSEVA, Arina
	- [3] Local adaptation of three-spined Stickleback ecotypes to habitat-specific parasites	GAHR, Christoph
