

Microbial community ecology: bridging theory and observations

Wednesday 12 July 2023

Poster session - Lecture hall - interim building (17:00-19:00)

[id] title	presenter	board
[7] Immunity and competition between bacteria in the gut	WOLLER, Aurore	
[5] Chaos and noise: disorder in population dynamics	RAMIREZ, Alejandra	
[9] Genome-assisted characterization and protective role of synthetic microbial community in <i>Arabidopsis thaliana</i> phyllosphere	CHAUDHRY, Vasvi	
[21] Changes in the root microbiota during the colonization of a pioneer plant after Tropical Glacier retreat	RODRIGUEZ, Gisela	
[17] Are diverse soil bacterial communities more resistant to extreme temperature events?	GHENU, Ana-Hermina	
[32] Parvilucifera s. and microorganism billiards: breaking free through narrow escapes	ZANOLI, medea	
[29] Multilevel selection models for microbiomes	DE AZEVEDO LOPES, Amanda	
[27] Multistability of the gut microbiome in response to drug perturbation	WILLIAMSON, Kate	
[26] Interplay of structure and randomness in complex ecological communities	GIRAL, Juan	
[14] Defining features of distributed metabolism in microbial communities	HENDERSON, Alyssa
