

# Genetics of Migration

## Monday 11 March 2024

**Keynote: Kristina Brauburger - Lecture Hall (15:15-16:00)**

time	[id] title	presenter
15:15	[4] The Australian Bogong moth - an emerging model system to investigate highly directed long-distance migration	BRAUBURGER, Kristina

# Tuesday 12 March 2024

**Keynote: Koosje Lamers - Lecture Hall (09:30-10:15)**

time	[id] title	presenter
09:30	[1] Migratory connectivity of pied flycatchers unravelled in a common garden experiment	LAMERS, Koosje

**Keynote: Gillian Durieux - Lecture Hall (11:30-12:15)**

time	[id] title	presenter
11:30	[5] The neurogenomics of avian migration	DURIEUX, Gillian

**Keynote: Kazuhiro Wada - Lecture Hall (17:15-18:00)**

time	[id] title	presenter
17:15	[3] Unraveling the neural and genetic basis of species-specific song learning: A comparative single-cell transcriptomic analysis in songbirds	WADA, Kazuhiro

# Wednesday 13 March 2024

**Keynote: Jane Reid - Lecture Hall (09:30-10:15)**

time	[id] title	presenter
09:30	[7] Quantitative genetic approaches to predicting micro-evolutionary dynamics of migration in the wild	REID, Jane M.

**Keynote: Teresa Pegan - Lecture Hall (11:30-12:15)**

time	[id] title	presenter
11:30	[2] Comparative analysis of a species assemblage reveals effects of migratory strategy on population genetic patterns in North American boreal birds	PEGAN, Teresa

# Thursday 14 March 2024

## **Keynote: Daria Shipilina - Lecture Hall (10:30-11:15)**

time	[id] title	presenter
10:30	[6] Genomics of butterfly migration: insights from the painted lady butterfly (Vanessa cardui)	SHIPILINA, Daria
